“I am lonely,” 2021, acrylic on canvas, by Nicholas Kontaxis. Contemporary artist Nicholas Kontaxis creates large-scale abstract paintings, characterized by a riot of primary colors. Kontaxis’ complex pieces utilize heavy body acrylic paints and a battalion of pallet knives on massive canvases. The 27-year-old’s personal background is also especially distinct—in addition to being neurodiverse, Kontaxis was born with an extensive brain tumor that has resulted in intractable epilepsy. <https://www.nicholaskontaxis.com/>
